### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

- 1) ☒ Responsive to communication(s) filed on 21 November 2003.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

- 6) ☐ Other: \_\_\_\_\_.

## **DETAILED ACTION**

### ***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-23, drawn to stapling device with at least two stapling head, classified in class 227, subclass 111.
- II. Claim 24, drawn to Gather-stapling machine with gathering and transporting unit to gather and transport the material to be stapled, classified in class 227, subclass 44.
- III. Claim 25, drawn to method for stapling sheet-like material, classified in class 270, subclass 58.01.

The inventions are distinct, each from the other because of the following reasons:

Inventions Groups I, II and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions as set forth above in the three groups rely upon particulars for patentability, which are not set forth in the other groups.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

During a telephone conversation with Mr. William Breneman (Reg. No. 26,714) on 1/24/2005 a provisional election was made with traverse to prosecute the invention of group I, claims 1-23. Affirmation of this election must be made by applicant in replying to this Office

Art Unit: 3721

action. Claim 24 and 25 are withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

#### ***Claim Objections***

Claims 4-23 are objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim cannot depend from any other multiple dependent claim. See MPEP § 608.01(n). Accordingly, the claims 4-23 have not been further treated on the merits.

#### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-3 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1, the phrase "or the like" renders the claim(s) indefinite because the claim(s) include(s) elements not actually disclosed (those encompassed by "or the like"), thereby rendering the scope of the claim(s) unascertainable. See MPEP § 2173.05(d). Further, the phrase "can be" in line 5 is passive and not a positive recitation. In claim 3, "and/or" in line 2 is unclear as to whether applicant is claiming stapling heads and clinchers, again whether applicant is claiming stapling heads or clinchers.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3 are rejected under 35 U.S.C. 102(b) as being anticipated by Radtke et al.(US 5,005,751).

With regard to claim 1, Radtke et al. discloses a stapling device with at least two stapling heads (15) movable and adjustable relative to each other; and attached to a stapling head unit (fig. 1); and a drive unit (42, 44) for setting the distance between the stapling heads (15).

With regard to claim 2, Radtke et al. shows at least two movable clinchers (61) and one drive unit (42, 44) for setting the distance between the clinchers (61) as the stapling device and clinchers move in unison.

With regard to claim 3, Radtke et al. shows stapling heads and clinchers, movably accommodated in a guide (26, 27).

***Conclusion***

Refer to attachment for notice of references cited and recommended for consideration based on their disclosure of limitations of the claimed invention.
